

Dr. Samantha Meltzer-Brody, MD, MPH is the Assad Meymandi Distinguished Professor and Chair of Psychiatry at the University of North Carolina at Chapel Hill. She is an internationally recognized reproductive psychiatrist and clinician-scientist who also directs the UNC Center for Women's Mood Disorders.

Her funded research investigates epidemiologic, genetic, and biomarker models of perinatal depression. She also studies the use of novel technologies and innovative treatment modalities focused on optimizing and personalizing treatment for women with perinatal depression.

She is currently the President of the Marce Perinatal Depression Research Society of North America.
