

What is RE-AIM and How Can I use it? A General Overview of the Dimensions of RE-AIM and Resources to Help You Use It

Workshop Description

In the last 20 years, RE-AIM has become one of the more discussed and utilized frameworks in implementation research spanning across the fields of both dissemination (active delivery of intervention information) and implementation (getting an intervention to practice) research. RE-AIM is an adaptable framework that has been utilized beyond the clinical realm across both public health and community settings. This workshop will consist of an overview of the RE-AIM framework including all five dimensions (Reach, Effectiveness, Adoption, Implementation, and Maintenance). To assist in better intergration of the five dimensions within research, the host will discuss the basics of both dissemination and implementation research. Case examples will be presented and publically available resources, including re-aim.org, will be introduced with encouraged moments for feedback and discussion. This workshop will be audience driven with ample opportunity to bring questions you might have about utilizing RE-AIM in your own work.

Workshop Start Time

US - Pacific	US - Mountain	US - Central	US - Eastern	BRT (Brasilia)	BST (British Summer Time)	CEST (Central European Summer Time)	SAST (South Africa Standard Time)	IST (India Standard Time)	JST (Japan Standard Time)	AEST (Australian Eastern Standard Time)	AEDT (Australian Eastern Daylight Time)
Mon 12:00 PM	Mon 1:00 PM	Mon 2:00 PM	Mon 3:00 PM	Mon 4:00 PM	Mon 8:00 PM	Mon 9:00 PM	Mon 9:00 PM	Tue 12:30 AM	Tue 4:00 AM	Tue 6:00 AM	Tue 7:00 AM

Target Audience

Beginners in Implementation Science

Beginners in RE-AIM Knowledge

Those interested in Implementing interventions in public health (community and clinical) settings

Presented by

Thomas E. Strayer III, PhD

Dr. Strayer has a keen interest in the planning and implementation of health promotion and behavioral interventions in both the clinical and community settings. His dissertation work focused on dissemination research and the mechanisms to actively deliver information surrounding evidence-based interventions through a national health promotion delivery system. Dr. Strayer has also worked and contributed in the use of RE-AIM in the planning and evaluation of several health promotion programming across multiple states in community settings. Dr. Strayer has also been managing the RE-AIM website, email, and analytics since 2017.
